

ANDREW DAILEANES

ECONOMICS · DATA SCIENCE · SPORTS ANALYTICS

Amesbury, MA 01913 | (857) 272-4135 | andrewdaileanes@gmail.com | linkedin.com/in/andy-daileanes-805007350

EDUCATION

Davidson College

2022–2026

B.A. in Economics, Minor in Data Science | GPA: 3.6, Cum Laude

Coursework: Econometrics, Statistics, Sports Economics, Corporate Finance, Industrial Organization, Urban Economics, Accounting

University of New South Wales

Spring 2025

Semester Abroad—Sydney, Australia; Coursework in Economics and Data Analytics

INDEPENDENT RESEARCH

Independent Honors Research—Davidson College, Department of Economics

NBA Second Apron Labor Market Analysis

Spring 2026

How the NBA's Second Apron Has Reshaped Mid-Level Veteran Labor

- Assembled and cleaned a panel dataset of 3,645 NBA player-seasons (2011–2026) in Excel before running fixed-effects regressions in R on the second apron's effect on labor utilization across high-salary veteran, mid-level, and rookie-scale players
- Estimated fixed-effects models showing mid-level veterans lost an average of 3.2 minutes per game and shifted from starting to bench roles post-apron ($p < 0.01$), while rookie-scale players absorbed more starting opportunities
- Documented a compositional shift toward younger, higher-performing players within the mid-level veteran salary band (7–13% of the cap) post-apron, and assessed robustness through placebo tests and contender/non-contender subsample analyses

NBA Luxury Tax Capital Allocation Analysis

Spring 2026

How Escalating Regulatory Costs Shape Firm Capital Allocation: Evidence from the NBA Luxury Tax

- Compiled and cleaned a panel dataset of 450 NBA team-seasons (2011–2025) in Excel before running fixed-effects regressions in R to examine how tax threshold proximity shapes team payroll positioning and capital concentration
- Found teams finishing closer to the luxury tax threshold allocated a significantly larger payroll share to their top three players the following season ($p < 0.001$), with a one-SD increase in tax proximity linked to a 2.6-percentage-point rise in concentration
- Used the NBA luxury tax as a natural laboratory to study how escalating regulatory costs shape capital allocation, and assessed results' stability through ownership-transition exclusions, alternative specifications, and reverse-causality checks

SPORTS ANALYTICS EXPERIENCE

TxODDS—Basketball Scout

2025–2026

- Recorded and verified live in-venue game data—scores, play events, match details—for Division I college basketball games using proprietary mobile data capture tools, powering one of the industry's most accurate sports betting and analytics feeds
- Operated in a high-pressure, time-sensitive environment, maintaining rigorous speed and accuracy standards on-site
- Coordinated coverage schedules with operations teams to ensure seamless, reliable reporting across assigned games

Chatham Anglers, Cape Cod Baseball League—Baseball Operations Intern

Summer 2025

- Supported day-to-day operations for the Chatham Anglers, working closely with the team's President within the nation's premier collegiate summer baseball league
- Contributed to game-day logistics, player services, and organizational events, assisting across operational needs
- Assisted with fundraising and community initiatives sustaining the league's non-profit structure, gaining exposure to the administrative and community-facing sides of baseball operations

Cats Stats Club, Davidson College—Analyst

2022–2026

- Collected, analyzed, and communicated performance data to coaching staffs through Cats Stats analytics organization
- Prepared statistical reports that supported player evaluation and game-planning discussions
- Collaborated with fellow student analysts to organize and maintain performance datasets across Davidson Athletics programs

TECHNICAL SKILLS

Programming: R, Python, SPSS, SQL, Tableau

Data Analysis & Tools: Excel, ArcGIS & Geostatistical Tools, Google Suite, Microsoft Office

Econometric Methods: Panel Data Analysis, Fixed-Effects Models, OLS Regression, Robust & Clustered Standard Errors, Placebo Testing, Multicollinearity Diagnostics (VIF)

Additional Tools: HTML/CSS, Adobe Premiere Pro, Canva, Financial Forecasting & Budgeting, Conversational Spanish

ADDITIONAL QUALIFICATIONS & INTERESTS

- Health and Wellness: Enrolled in CSCS Certification (Est. Date of Completion–December 2026)
- CPR/AED Certified (2026)
- Varsity Basketball, Baseball, and Golf, Amesbury High School (2018–2022)
- Intramural Football, Soccer, Skiing, Rugby, and Basketball, Davidson College & UNSW (2022–2026)
- Volunteer Fundraiser, Dana-Farber Lungstrong Nonprofit (2017–2023)
